Integrated Mobile POS for your ERP and Ecommerce

Sales associates no longer need to remain tethered to a traditional cash register but can make sales with their mobile devices from any location

- In-stores
- Tradeshows
- Pre-sales
- Route sales

i95POS is a feature rich point of sale extension that can seamlessly integrate with your eCommerce and ERP systems. The Mobile POS effectively manages point of sale in combination with the back-end to provide enhanced capabilities over the traditional POS systems. This will enable your sales personnel to interact and transact with your customers anytime anywhere, by having all of the latest product information, inventory levels and pricing at their fingertips.

With the capabilities to complete the transaction in front of the customer on a handheld device, you can speed up the purchase process, cut out the lines and enhance customer service. All this, with the added benefit of seamless, information sync with your ecommerce store and ERP system.

Features

Products & Inventory

Access updated product and inventory information in real time, regardless of where the products are sold.

Orders

Select a customer, add products, update quantity, apply discount, take payments and offer receipts effortlessly.

Payments

Allow your associates to accept various payment methods anywhere in the store, including debit card, credit card, and cash.

Search

Quickly search for products using keywords (SKU, Name, Product type) or a barcode scanner and find customers using name, email or phone number.

Clock-In and Clock-Out

Manage user activity with Clock-In and Clock-Out. The device mandates users to log in to the device and clock in before taking any orders.

eBay/ Amazon Integration

Integrate with third party marketplaces like eBay or Amazon for increased sales and improved brand visibility.

Offline Functionality

Now take orders even when you are not connected to the internet and sync orders when both the systems are online and connected.

Images and Videos

Leverage product images (with Image zoom) and videos to educate customers and close deals faster.

Customers

Create new customer records or view customer and order related information for informed decision making.

Discounts & Taxes

Apply a fixed \$ or % discount on the order total. The application automatically calculates the taxes based on your location.

Hardware Devices

Connect a barcode scanner, a card reader and a blue tooth printer to quickly search and add products to cart, accept payments and complete the sale transaction with a receipt.

Cash Management

Reduce errors, and discrepancies by recording all cash in and cash out transactions. Any variance above a certain threshold requires supervisor's authentication.

Back Office Integration

Further extend the solution to integrate with back office systems like ERP, POS and CRM Systems for streamlined business process.

RANGE OF CLIENTS

- + Retail Stores
- + Traders
- + Manufacturers
- + Shop in Shops

Partners not Vendors

78% of the revenue turns out with reference, recommendations and repetitive clients. We serve and enjoy growth of our partner by delivering quality and adding enduring value first time, every time and on time.
